

Glenn P. Aga

Executive Vice President

CORPORATE BIOGRAPHY

Glenn P. Aga is the Executive Vice President at Good Harbor Consulting. Mr. Aga is a professional security and intelligence consultant advising U.S. government, foreign government and corporate clients on a range of issues including corporate security risk management, information security technology, and counter-terrorism.

Mr. Aga is a former U.S. Air Force intelligence officer with overseas crisis experience in the Middle East, Africa, and Balkans. He also served in the White House as a Military Social Aide, the National Reconnaissance Office, the Office of the Secretary of Defense, and the State Department's Bureau of Intelligence and Research. Functionally, he has supported and applied technology for counter-terrorism operations, United Nations peacekeeping operations, and served as an all source intelligence analyst on global chemical and biological weapons capabilities.

Following his military service, Mr. Aga joined the corporate world, first as Director of Middle East and North Africa business affairs for ORBCOMM Global, a satellite communications company. Then, he spent four years at Oracle Corporation (ORCL). While at Oracle, he developed a highly successful consulting practice focusing on space and intelligence systems security for major integrators in the Western United States.

Mr. Aga participates in the U.S. Department of Homeland Security Lessons Learned Advisory Council and has advised at the National Memorial Institute for the Prevention of Terrorism. He is a former Public Safety Commissioner in Orange County, California, where he advised local government leaders on first responder, emergency preparedness, and crisis management issues.

Mr. Aga holds a B.A. in International Relations from the American University's School of International Service in Washington, D.C. He obtained concentrations in Contemporary Middle Eastern Politics and Economics. He has subsequently studied at the U.S. Foreign Service Institute, the U.S. Air Force Special Operations School, and numerous advanced analytic courses within the U.S. Intelligence Community.
